Professional Summary

B.Tech student in **Artificial Intelligence and Data Science** with hands-on experience in cybersecurity, full-stack web development, and AI-powered systems. Built and deployed multiple real-world applications including an AES-256 encryption tool, a real-time communication platform, and a RAG-based AI chatbot. Secured **2nd Prize** at IEEE-CIS Chatbot Buildathon. Seeking internship opportunities to apply skills in AI, security, and web development.

Work Experience

Cybersecurity Intern | Supraja Technologies

Jun 2025 – Jul 2025

Vijayawada, Andhra Pradesh (On-site)

- Performed vulnerability analysis and ethical hacking tasks using **Metasploit Framework**, identifying and documenting security weaknesses in controlled lab environments.
- Gained practical exposure to **network security**, threat mitigation strategies, and secure system architecture under professional mentorship.
- Completed project-based assessments covering penetration testing workflows and security hardening techniques.
- Collaborated in a team environment to solve real-world security challenges, strengthening communication and problem-solving skills.

Projects

Secure Vault — AES Folder Encryption Tool

🔗 GitHub Repo

Python · AES-256 · CustomTkinter · Gmail API

- Built a desktop security application using **AES-256 encryption** with file-name obfuscation and secure key management, ensuring zero plaintext leakage of sensitive folder contents.
- Designed an intuitive GUI using **CustomTkinter** with one-click encryption/decryption, automatic backup creation, and visual progress feedback for a smooth user experience.
- Integrated **Gmail automation** for encrypted key delivery, eliminating manual key-sharing risk and demonstrating a real-world secure workflow.

LiveTalk — Real-Time Communication Platform

🔗 Live Demo

JavaScript · HTML/CSS · Netlify · WebSockets

- Developed and deployed a responsive **peer-to-peer real-time chat** web application with a mobile-first UI, supporting seamless communication across devices.
- Applied **SEO optimization** fundamentals and Netlify CI/CD deployment workflows, demonstrating production-readiness and awareness of modern web deployment practices.

Department AI Assistant — RAG Chatbot System

🔗 GitHub Repo

Python · LangChain · RAG · Vector Embeddings · Flask

- Architected a **Retrieval-Augmented Generation (RAG)** chatbot for academic use, enabling document-grounded answers to student queries and reducing reliance on LLM hallucinations.

- Implemented a **vector-based document retrieval pipeline** with admin content management, allowing department staff to update the knowledge base without code changes.
- Designed context-aware chatbot interaction flows demonstrating applied knowledge of modern **AI system design patterns**.

Technical Skills

Languages	Python, Java, C
Web Dev	HTML, CSS, JavaScript, React, Responsive Design, SEO Basics
AI / ML	RAG Systems, LangChain, Vector Embeddings, Prompt Engineering
Cybersecurity	Metasploit, AES Encryption, Penetration Testing, Network Security
Tools	Git, GitHub, Netlify, Firebase, VS Code

Hackathons & Achievements

2nd Prize — Chatbot Buildathon | IEEE-CIS, NBKRIST · TECHTATVA 2K25 2025
Won 2nd place among competitive teams by building a fully functional AI chatbot under contest conditions.

National Hackathon Participant | Mission Schrödinger's Cat · SRM AP University 2026

- Competed in a **36-hour national hackathon** with 1200+ participants, building **Kiosk Vision** — an offline-first smart kiosk with local UPI QR generation and AI-based voice/gesture interaction.
- Gained intensive experience in rapid prototyping, cross-functional teamwork, and high-pressure real-world problem solving.

Education

B.Tech in Artificial Intelligence & Data Science — NBKRIST 2023 – 2027
CGPA: 7.0/10

Intermediate (MPC) — Vamsi Junior College 2021 – 2023
Score: 756/1000

SSC Board — RPBS ZP High School 2020
Score: 564/600

Soft Skills

Communication · Problem-Solving · Teamwork · Adaptability · Quick Learning · Attention to Detail
